HARDY CHRYSANTHEMUMS

This year we have one of America's finest and most up-to-date collections. In this collection we have included representations of all groups, starting with the Azalea or Cushion Mums, large and medium doubles, singles, buttons, pompons, and including some of the best of the new English & Canadian. You will notice many of them are new this year, and many of them only of recent years. This collection represents the originations of all the leading Chrysanthemum Hybridizers in this country, such as Bristol, Dr. Krause, of the University of Chicago, Lehmanns, and Emberley, and many others including some of our own. In order to save space we have omitted the originators names as well as the year.
